

EIS Process

EIS Alternatives Development

This meeting is part of the **Alternatives Development** stage of the EIS process. During this stage, VDOT welcomes your input on the following important study elements:

- **Purpose and Need:** Recognize that the study corridor has capacity and roadway deficiencies that must be addressed.
- **Existing and Future Traffic:** Understand the stresses that the infrastructure must withstand in the future should no action be taken.
- **Alternatives:** Provide input on potential solutions that VDOT is considering that address the study needs.
